

AIR TREATMENT & CONDENSATE TECHNOLOGY

Filters Activated Carbon Adsorbers

Reliable and profitable, pure compressed air

Kaeser compressed air filters and activated carbon adsorbers provide your systems and processes reliable, highly efficient protection against dust, aerosols and oil vapours – for all purity classes as per ISO 8573-1, perfectly compatible with our range of compressors and other compressed air treatment options. Kaeser compressed air filters are available with a pressure of 16 bar, whilst high-pressure filters range up to 45 bar; filters are also available in a silicon-free version, such as for use in painting processes. The new high-tech filters for all purity classes, with generously dimensioned filter housings and top efficiency validated according to ISO 12500.

- Maximum working pressure: 16 bar.
- Aluminium housing with variable selectable threaded connections.
- Extremely straightforward installation and maintenance.
